### **DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Applicant's amendment filed 5/17/07 has been entered. Claims 1-18 have been amended. No claims have been cancelled. No claims have been added. Claim 1-18 are still pending in this application, with claims 1, 13, and 16-18 being independent.

#### ***Claim Rejections - 35 USC § 101***

3. Claims 13-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of the claim raises a question as to whether the claim is directed merely to an abstract idea that is not tied to a technological art, environment or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C. 101.

Claim 13, claims the non-statutory subject matter of a computer program. Data structures not claimed as a service unit embodied in computer-readable storage medium are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer. See, e.g., Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1754 (claim to a data structure per se held nonstatutory).

Art Unit: 2614

Therefore, since the claimed service unit is not tangibly embodied in computer-readable storage medium then the Applicant has not complied with 35 U.S.C 101.

Claims 14-15 are rejected because they depend on rejected claim 13.

Similarly, claims 16-18, claim the non-statutory subject matter of an electronic agent, software produce, and server, respectively, have the same defects. In addition, Applicant's Specification does not specify what kind of computer-readable storage medium. Failure to make the corrections could lead to 112 first paragraph rejections.

Furthermore, claim 17 recites "A computer readable storage medium encoded with program code... performs the function of the electronic agent according to Claim 16". Examiner respectfully submits that A computer readable storage medium encoded with program code... cannot perform the function of the electronic agent according to Claim 16. For example, in the first limitation of claim 16, when incorporate A computer readable storage medium encoded with program code... instead of the electronic agent which was not enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 18 has the same defects since claim 16 does not recite a server.

***Allowable Subject Matter***

4. Claims 1-12 are allowed.

**Conclusion**

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
